

# 1-1/4 PVC Dphgm Valve Flg w/EPDM

RG2723012

## Details

This full-featured PVC valve is engineered to provide accurate throttling control and shutoff for industrial, chemical and water treatment applications. Weir-type design eliminates entrapped fluids in valve and is excellent for handling liquids with suspended solids, viscous fluids and slurries. Available with a variety of Diaphragm material options. Easy-grip, high-impact polypropylene handwheel. Built-in, clear-view position indicator. Stainless steel external hardware.
